EDUCATION

University of Waterloo

Bachelor of Computer Science, Minor in Artificial Intelligence, 3.7 GPA

Waterloo, ON

Sep. 2021 – Aug. 2026

Wilfred Laurier University

Bachelor of Business Management, Minor in Finance

Waterloo, ON

Sep. 2021 – Aug. 2026

EXPERIENCE

Software Engineer

NimbleRX

Sep. 2025 – Dec. 2025

San Francisco, CA

- Built reusable **iOS Storybook** components for Nimble's **flagship mobile app**, accelerating feature development
- Designed and implemented a homepage prompt service to notify hospitals of time-sensitive updates
- Shipped weekly production features, maintaining **100% on-time delivery** by leveraging **LLM models**
- Implemented a bulk shift upload, reducing manual shift entry time by **90%** for enterprise-level hospitals
- Optimized backend APIs supporting scheduling and payments, reducing average response latency by **25%**

AI Software Developer

Armillar AI Inc

Jan. 2025 – Apr. 2025

Toronto, ON

- Optimized MongoDB queries and GraphQL resolvers to cut query time by **50%** via batch processing and caching
- Built a **Python package** to automate ML model assurance, streamlining validation workflows.
- Configured **Docker** containers to deploy from existing cached layers, cutting deployment time by **80%**.

Software Developer

HubSpot

Jan. 2024 – Apr. 2024

Boston, MA

- Implemented an AI chatbot using **DialogFlow** to answer customer inquiries and reduce response time by **22%**
- Performed ETL with **Pandas** on unstructured and structured SQL data to drive data solutions for large clients
- Designed and implemented a feature to upload and store client files securely in **AWS S3**
- Created **GitHub Actions** to automate the deployment process and test coverage for the company's codebase

Full Stack Developer

AutoTrader

Jan. 2023 – Apr. 2023

Toronto, ON

- Redesigned **landing page masthead** using **AngularJS**, improving load time and increasing engagement by **15%**
- Developed a video ad template using **Google Ad Manager** on the product page to increase ad revenue by **5%**
- Used cross-functional collaboration to solve incorrect translation issues on the company's backend

Software Developer

CSF

May 2022 – Aug. 2022

Ottawa, ON

- Created multiple **React** components to improve modularity and flexibility of code on application pages
- Worked with **Celery** and **Redis** to implement a distributed task queue to handle large data processing
- Implemented **JSDocs** that can be parsed by OpenAPI, for the company's codebase and developer documentation

PROJECTS

FilmFinder | Python, Django, React, Tailwind, PostgreSQL, Docker

Dec. 2024 – Mar. 2025

- Deployed project to the web and **Apple TVOS** App store with currently **100+ active users**
- Built a collaborative filtering model using **PyTorch** to recommend movies based on user interaction data
- Implemented **OAuth2** and **JWT-based authentication** for secure access to application and user data

Food Nutrition Visualization | Flask, React, REST API

May 2023 – Oct. 2023

- Designed a **REST API** to provide nutrition data for over 1000+ food items
- Developed a React front-end to interact and display the data visualizations for users

TECHNICAL SKILLS

Languages: Python, C/C++, Java, SQL (Postgres), Type/JavaScript, HTML/CSS, R, LaTeX

Frameworks: React, Node.js, Django, Flask, AngularJS, FastAPI, Express.js, Spring Boot

Developer Tools: Git, Docker, AWS, Eclipse, DataDog, Overleaf, Microsoft SQL Server, New Relic, Sentry, PostHog

Libraries: pandas, NumPy, Matplotlib, PyTorch, Scikit-Learn, XGBoost, Cypress
